

Follow this order when starting a new group.

Completed records show in dashboard and reports. Pending approvals do not change balances.

Full app flow

Quick flows

What users can do

Member login

Member registers with the same email used while adding member.

See own groups

After login, member can see all groups where that email is added.

Create new group

Logged-in user can create new group and becomes group admin.

Dashboard access

Members can freely see their own dashboard and group summary.

Active / inactive

Inactive members stop getting future event profit share.

Role restriction

Admin manages setup. Member gets view and own loan request access.

Withdrawal

Member requests self withdrawal.
Admin can request for any member.

Period restriction

If a period is open, entries are allowed only in that period.

Corrections

Wrong entries use adjustment or reversal. Original entry stays

Bachat Gat SaaS

Setup values and when to use them

Setup flow

1 Group setup

2 Member setup

3 Loan setup

4 Approver setup

Monthly saving

Default amount every member should pay each month.

Interest rate

Monthly rate. Example: 2 means 2 percent per month.

Penalty

Late payment charge. Keep 0 if the group does not use penalty.

Loan limit

Maximum loan allowed. Member setup can override group setup.

Loan tenure

Number of months allowed to repay the loan.

Due day

Monthly date by which loan repayment should be paid.

Approvers

People who approve loan, transaction, migration and

Open period

Only one month should be open when entries are being posted.

Rule: member setup value is used first. If blank or zero, group setup value is used.

Use financial setup before regular transactions so calculation stays correct.

Bachat Gat SaaS

Legacy migration and expense handling

Legacy migration flow

1 Choose member

2 Enter old balance

3 Check loan/expense

4 Migrate

When to use

Use when moving old notebook/register balance to this

Saving balance

Old saved amount held by the member.

Pending loan

Old loan amount still pending from that member.

Old interest

Interest already pending before using the app.

Old group gain

Profit already earned by group before app start.

Old expense

Expense already spent by group before app start.

Expense flow

1 Enter expense

2 Add split lines

3 Total must match

4 Member share reduces

Expense split line examples: rent, bank charges, meeting expense, stationery.

Header amount and all split line amounts must be equal before saving.

Loan interest sharing

1 Loan date share

2 Ignore new savings

3 Reduce withdrawals

4 Share interest

Loan interest

Shared by old share amount and how long it stayed in group.

New member

Member added after loan date does not get that loan interest.

Extra saving

Saving added after loan date is not counted for that loan.

Withdrawal

Withdrawal reduces old eligible share from that date.

Penalty

Shared equally between active members.

Other income

Shared equally between active members.

Example: penalty 100 and 2 active members means 50 each.

Example: other income 300 and 3 active members means 100 each.

Bachat Gat SaaS

Approvals, interest and corrections

Approval flow

Transactions

If approvers exist, collection waits until approval.

Loans

Loan request becomes active only after approval.

Migration

Old data migration waits for approval if approvers exist.

Corrections

Adjustment/reversal waits for approval if approvers exist.

Interest

Interest is calculated from setup rate and payment date.

Gain share

Group gain is shared by member share weight and holding time.

Wrong entry rule

- Use adjustment when amount is partly wrong.
- Use reversal when whole entry is wrong.
- Approved original record is never edited directly.
- Audit history keeps who changed what and when.

Common screens

Dashboard

Shows this month collection, savings, loans and balance.

Transactions

Use for savings, repayments, penalty and group expense.

Loans

Member requests loan.
Admin/approver approves before

Approvals

Approve or reject pending work assigned to you.

Reports & Audit

Download reports and see full history.

Contact

Raise issue and chat with support.

Remember

- Do not delete approved money entries.
- Use adjustment for small correction.
- Use reversal when full entry is wrong.
- Only completed entries show in dashboard.
- Open the correct period before posting.

End of guide

Dashboard and backend formulas

Total savings

Completed savings + excess savings
+ migrated savings + corrections.

This month collection

Savings + principal + interest +
penalty + migrated/corrections.

Remaining balance

Collections + migration - loans -
withdrawals - expenses.

Group gain

Interest + penalty + other income.
Waiver is not gain.

Member share

Savings + gain - expense -
outstanding loan/interest/penalty.

Saving split

Only unpaid saving for the month
is collected as saving.

Loan interest

Principal x monthly rate x days /
30 / 100.

Loan eligibility

Minimum of account balance and
member/group loan limit.

Distribution formulas

- Loan interest share = interest x member capital-time weight / total weight.
- Penalty share = penalty amount / active members.
- Other income share = other income / active members.
- Member setup is used first. If blank or zero, group setup is used.
- Waived interest reduces receivable amount. It is not distributed.

End of day or month checks

Group balance

Opening + collections + gain -
loans - withdrawals - expenses =

Member share

Opening share + saving + gain -
withdrawal - expense - loan due =

Transaction check

Header amount must equal all split
lines.

Expense check

Expense header must equal category
line total.

Loan check

Opening loan + disbursement +
charges - repayments - waiver =

Approval check

Pending entries do not affect
dashboards until completed.
